

HOSH DOMINGO

Software Engineer

Pasig City, Metro Manila, Philippines | +63 917 798 1499 | domingohoshaiah@gmail.com

SUMMARY

Career shifter who went from management engineering to engineering production payment systems in four years. I specialize in clean, high-precision code for financial systems, where a rounding error costs real money. Strong in Ruby on Rails and React, I pick up new domains fast and take problems from blank page to production.

EXPERIENCE

Software Engineer II | PayMongo Philippines, Inc.

Nov 2023 – Jul 2025

- **Led a cross-functional team to ship cryptocurrency as a new payment method**, expanding payment flexibility and strengthening PayMongo's partnership with Coins.ph.
- **Reduced new payment method integration time from 6 months to 6 weeks** by revamping the integration architecture and underlying codebase.
- **Cut support-related tickets by 90%** by designing and shipping a Merchant Management System, enabling Finance to oversee thousands of merchants without engineering involvement.
- **Automated tax compliance on ₱100M+ in merchant payouts** in full alignment with BIR regulations, building a system that computed withholding taxes and generated required regulatory files automatically for thousands of merchants.
- **Owned services end to end across architecture, deployment, and production support** on a containerized AWS stack.

Stack: Ruby on Rails, React, JavaScript, AWS ECS, Docker.

Software Engineer | HCL Technologies

Apr 2022 – Nov 2023

- **Recognized in the top 3% of engineers** in annual performance review.
- **Pioneered R&D for a major revamp** of the company's website builder platform, which evolved into a successful standalone product line.
- **Drove a 40% increase in organic traffic** for customers by building keyword integration into the CMS, enabling enhanced content filtering and SEO uplift.
- **Increased feature adoption by 30%** by shipping enhanced file management (bulk copy and move) that accelerated customer content workflows.
- **Reduced content creation time by 90%** by integrating AI-assisted content generation via the ChatGPT API.

Stack: React, TypeScript, Redux, Java, Node.js, Jenkins, Enzyme, Kubernetes.

SKILLS

Languages: Ruby, JavaScript, TypeScript, Swift, Python, HTML/CSS

Frameworks: Ruby on Rails, React, React Native, Redux, Next.js, Node.js

Infrastructure: AWS (ECS, EC2, RDS), Docker, Kubernetes, Jenkins, CI/CD

AI & Tooling: Claude Code, agentic coding, OpenAI / Anthropic APIs, AI-assisted feature development

Practices: System design, distributed systems, RSpec, Jest, Enzyme, Git / GitHub

EDUCATION

Avion School — Software Engineering Bootcamp (full-stack: React, Ruby on Rails)

Ateneo de Manila University — BS Management Engineering
